

CORONA DEL MAR NEIGHBORHOOD READINESS TEAM

Hello Corona del Mar Neighbor:

We are members of an ever-growing group of volunteer residents who are trained and certified for Disaster Preparedness by the Newport Beach Fire Department.

The City of Newport Beach recognizes that its resources will be severely impacted following a major disaster. As Community Emergency Response Team (CERT) members, we have been trained to help ourselves and our neighbors in the event of a major disaster until professional first responders arrive.

When a major disaster such as an earthquake strikes, everyone must be prepared to be self sufficient for a minimum of 72 hours, or better yet up to two weeks. Have you prepared yourself, your family and your pets for this? We want to help you answer YES!

CERT volunteers are developing Disaster Response Plans for each neighborhood in Newport Beach which will identify meeting locations, information and communications processes, supply lists, and more.

We have been trained to “Start Where We Stand”, and that includes each of us in our own homes. We want to provide you with the information you need to make your own family plan and build or buy your own family disaster kit. We want to provide you with a copy of your neighborhood Disaster Response Plan. And we’d be happy to provide you with information on more formal training, free to Newport Beach residents.

Take the first step to prepare yourself, your family and your pets. Turn this page over and make a call. You’ll be glad you did.
